

**Teacher(s):** Mrs. Breazeale & Ms. DeBLanc

**Subject/Grade:** 7<sup>th</sup> /Grade Math

**Days Covered:** February 15, 2024 & February 16, 2024

**Domains:** Numbers & Operations, Ratios & Proportions,  
& Geometry

**Lesson Plan Title:** Test Prep & Review

**Q3W6**

**MATHEMATICS - Mississippi College and Career Readiness Standards for 7<sup>th</sup> Grade**

**7.NS.3** Solve real-world and mathematical problems involving the four operations with rational numbers.

**7.RP.1** Compute unit rates associated with ratios and fractions, including ratios or lengths, areas and other quantities measured in like of different units.

**7.EE** Solve real-life and mathematical problems using numerical and algebraic expressions and equations. (VOCABULARY)

**7.G.1** Solve problems involving geometric figures, including actual lengths and area of a scale drawing.

**ESSENTIAL QUESTION:** How will I use mathematical vocabulary and a variety of strategies to analyze and solve real-world problems?

	<b>Focus Question</b>	<b>Objective</b>	<b>I will...</b>
<b>Bell Ringer</b>	What are the order of operations & how can I use them?	TSWBAT follow the order of operations to calculate four “naked” problems by discussing the process within a small group.	Use the order of operations to calculate naked problems.
<b>Center 1: The Number System(NS.3)</b>	How do I solve real-world and mathematical problems involving the four operations with rational numbers?	TSWBAT add, subtract, multiply, and divide rational numbers to solve eight real-world mathematical problems with the help of group members and the UNRAVEL strategy.	Solve real-world and mathematical problems involving the four operations with rational numbers
<b>Center 2: Ratios &amp; Proportions (RP.1)</b>	How will I compare & compute unit rates associated with rational numbers and quantities measured in different units?	TSTBAT determine the best deal when given 10 scenarios by calculating the unit rate of ALL food items and participating in small group discussions.	Calculating the unit rate of two food items to determine the best deal.
<b>Center 3: Expressions &amp; Equations (EE – Vocabulary)</b>	How will learning mathematical vocabulary help me understand and explain mathematical procedures?	TSTBAT use algebraic vocabulary to place 20 “I have...Who Has?” vocabulary cards in order with the help of a small group.	Use my knowledge of algebra vocabulary to place game cards in order.
<b>Center 4: Geometry (G.1)</b>	What is scale factor and how will it help me understand how scale drawings are created?	TSWBAT use reference materials to solve six mathematical problems involving scale drawings.	Use scale factor to solve real-world problems involving scale drawings.
<b>Early Finishers</b>	Which strategies will I use to solve a variety of mathematical problems?	TSWBAT solve twelve MAAP style questions while sharing and discussing strategies within a small group.	Use mathematical skills and strategies to solve a variety of real-world mathematical problems.

# EARLY FINISHERS

**If you finish any center before time is up, work on the “Early Finishers” Practice page found on your table.**

## **Early Finishers**

TSWBAT solve twelve MAAP style questions while sharing and discussing strategies within a small group.

Use mathematical skills and strategies to solve a variety of real-world mathematical problems.

# Centers that **MUST** be Completed Today

**GROUP C**  
Centers **3** & **4**

**GROUP D**  
Centers **4** & **3**

**GROUP B**  
Centers **2** & **1**

**GROUP A**  
Centers **1** & **2**

# Center 1: The Number System

Monique makes 18 out of 27 shots in a basketball game. Which decimal represents the fraction of shots Monique makes?

- A 1.5
- B  $1.\bar{5}$
- C 0.6
- D  $0.\bar{6}$

1

Scott correctly writes each fraction below as a decimal. Which fractions have terminating decimals?

- a.  $\frac{7}{15}$
- b.  $\frac{3}{15}$
- c.  $\frac{8}{15}$
- d.  $\frac{6}{15}$

2

Camille is taking a quiz on a computer. The computer says her score is 0.625. Which fractions are equivalent to 0.625?

- A  $\frac{15}{24}$
- B  $\frac{19}{32}$
- C  $\frac{11}{16}$
- D  $\frac{5}{8}$

3

Carmen is  $5\frac{1}{4}$  years younger than Antoine. Katy is  $11\frac{1}{2}$  years older than Carmen. To the nearest year, what is the difference in Antoine's age and Katy's age?

- A) Antoine is about 17 years older than Katy.
- B) Antoine is about 6 years older than Katy.
- C) Antoine is about 6 years younger than Katy.
- D) Antoine is about 17 years younger than Katy.

4

# Center 1: The Number System

Maria drinks  $24\frac{3}{4}$  gallons of water each week. Juan drinks  $15\frac{1}{4}$  gallons of water each week. How much more water does Maria drink each week?

- A)  $9\frac{1}{2}$  gallons
- B) 20 gallons
- C)  $29\frac{1}{2}$  gallons
- D) 40 gallons

5

Anita, Jared, and Steph are rock climbing. Anita is  $42\frac{1}{2}$  feet below Jared. Steph is  $67\frac{3}{4}$  feet above Anita. What is Steph's position compared to Jared?

- A) Steph is  $25\frac{1}{4}$  below Jared.
- B) Steph is  $25\frac{1}{4}$  above Jared.
- C) Steph is  $15\frac{3}{4}$  below Jared.
- D) Steph is  $15\frac{3}{4}$  above Jared.

6

Browning, Montana, holds the U.S. record for the greatest temperature drop in one day. On January 23, 1916, the temperature changed by an average of  $-4.17^{\circ}\text{F}$  per hour. What was the total temperature change after 24 hours?

- A) -100.08
- B) -28.17
- C) -19.83
- D) 28.17
- E) 28.17
- F) 100.08

7

Steve, Ja'Mere, and Liza accidentally broke a Chromebook computer which gives them a combined debt of \$500. They decide to split the cost evenly. How much money will each student have to pay to replace the computer? Round your answer to the nearest cent.

- A) \$166.67
- B) \$250.50
- C) \$500.00
- D) \$1500.00

8

## Center 2: Ratios & Proportions

# Center 2: Ratios & Proportions

## Let's Make A Deal!

Your objective is to find the best deal when given two options. Bubble in the option that is the best deal and write the unit rate of that option on the line provided.

Option 1	VS.	Option 2	Best Deal
Sargento Cheese Slices \$2.48 for 10 Slices	VS.	Velveeta Cheese Slices \$3.18 for 12 Slices	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Oreos \$2.98 for 15.5oz	VS.	Chips Ahoy \$2.50 for 14oz	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Doritos \$4.39 for 11.5oz	VS.	Cheetos \$2.24 for 9.75oz	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Sarah Lee Turkey \$6.58 per lb	VS.	Butterball Turkey \$11.16 for 2lb	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Coca-Cola \$1.29 for 1.25L	VS.	Pepsi \$2.49 for 2L	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____

# Center 2: Ratios & Proportions

Option 1	VS.	Option 2	Best Deal
Cheerios \$3.68 for 17oz	VS.	Apple Jacks \$2.89 for 13oz	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Kidney beans \$1.18 per lb	VS.	Lima beans \$2.13 for 2lb	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Goldfish Crackers \$1.99 for 7.2oz	VS.	Cheese-Its \$2.70 for 13.7oz	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Daisy Sour Cream \$1.49 for 8 oz	VS.	Kraft Sour Cream \$2.55 for 16oz	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____
Crayola Crayons \$6.97 for 120	VS.	Rose Art Crayons \$1.53 for 24	<input type="radio"/> Option 1 <input type="radio"/> Option 2 Unit Rate: _____

## Center 3: Expressions & Equations

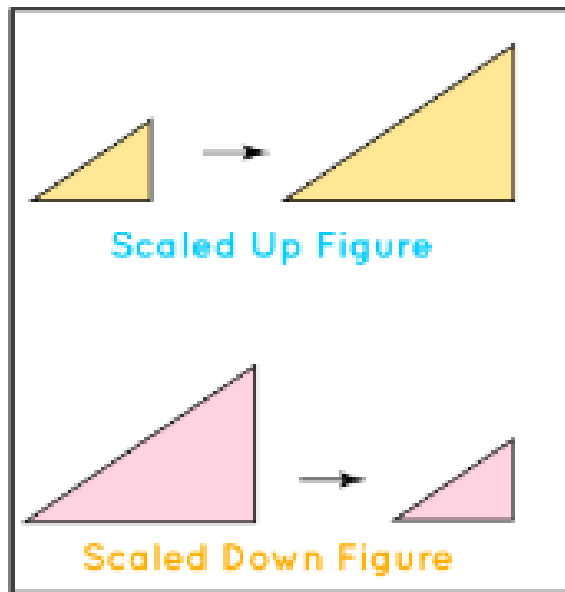

**I Have... Who Has?**

## Center 4: Geometry

# Scale Factor (7.G.1)

Scale factor =  $\frac{\text{Dimension of the new shape}}{\text{Dimension of the original shape}}$

The corresponding sides of similar figures are **proportional**.

$$\frac{AB}{DE} = \frac{BC}{EF} = \frac{AC}{DF}$$

The ratios of the corresponding sides are the same.

The scale factor of  $\triangle ABC$  to  $\triangle DEF$  is **2**.

Multiply each side by 2

**The Order is Important!**

$\triangle 1 \rightarrow \triangle 2$   
**Getting Bigger:**  
 The scale factor of  $\triangle 1$  to  $\triangle 2$  is larger than 1.

$\triangle 2 \rightarrow \triangle 1$   
**Getting Smaller:**  
 The scale factor of  $\triangle 2$  to  $\triangle 1$  is a fraction smaller than 1.

# Center 4: Geometry

## Question 1 (7.G.1)

A building has a height of 125 meters and a length of 80 meters. On a scale drawing of the building, the height is 25 centimeters.

What is the length of the building on the scale drawing in centimeters?

- F 55 cm
- G 16 cm
- H 20 cm
- J 64 cm

## Question 2 (7.G.1)

Triangle  $QRS$  and its dimensions are shown.

Which measurements in centimeters represent the dimensions of a triangle that is similar to triangle  $QRS$ ?

- A 8 cm, 14 cm, 17 cm
- B 10 cm, 20 cm, 25 cm
- C 4 cm, 10 cm, 13 cm
- D 12 cm, 24 cm, 36 cm

## Question 3 (7.G.1)

Triangle  $HJK$  is similar to triangle  $LMN$ .

Which proportion can be used to calculate the length of  $LN$  in centimeters?

- A  $\frac{7.5}{11.25} = \frac{LM}{4.5}$
- B  $\frac{6}{7.5} = \frac{LM}{9}$
- C  $\frac{11.25}{LM} = \frac{4.5}{7.5}$
- D  $\frac{9}{LM} = \frac{6}{4.5}$

# Center 4: Geometry

## Question 4 (7.G.1)

Pentagon  $FGHIK$  is similar to pentagon  $RPQST$ .

What is the value of  $x$ ?

- A 13.5
- B 12
- C 9.5
- D Not here

## Question 5 (7.G.1)

An engineer created a scale drawing of a building using a scale in which 0.25 inch represents 2 feet. The length of the actual building is 250 feet.

What is the length in inches of the building in the scale drawing?

## Question 6 (7.G.1)

A contractor is given a scale drawing of a rectangular patio. The scale from the patio to the drawing is 4 ft to 1 in. What is the area of the actual patio?

- A  $27 \text{ ft}^2$
- B  $54 \text{ ft}^2$
- C  $170 \text{ ft}^2$
- D  $192 \text{ ft}^2$

# Early Finishers

## 7<sup>th</sup> Grade Math Mixed Practice #1

Directions: Read each question carefully and solve. Show work when applicable.

1) A clock face has a circumference of 39.88 cm .

Find the diameter of clock.

Use  $\pi = 3.14$ .

- (A) 6.35 cm
- (B) 12.7 cm
- (C) 19 cm
- (D) 25.40 cm

2) The side lengths 11 cm, 12 cm, and 23 cm form a triangle.

- (A) True
- (B) False

3) Find the measure of angle b.

b =  degrees

4) The expression  $-4(2x - 5)$  is equivalent to  $4(-2x + 5)$ .

- (A) True
- (B) False

5) Solve for  $x$ .

$$4x - 2 = 38$$

6) Ms. Streater gave her class 12 minutes to read. Danielle read  $5\frac{1}{2}$  pages in that time. At what rate, in pages per hour, did Danielle read?

7) What is the distance between - 3 and 12?

- (A) 9
- (B) - 9
- (C) 15
- (D) - 15

8) A television,  $t$ , is on sale at a 30% discount. The expressions,  $t - 0.3t$  and  $0.7t$ , can be used to represent how to calculate the cost after the sale after the sale.

- (A) True
- (B) False

# Early Finishers

9 Find the surface area of the figure below.

m<sup>2</sup>

10 The solution set of the inequality  $12 - 13x \geq -1$  is

- (A)  $x \geq 1$
- (B)  $x \geq -1$
- (C)  $x \leq 1$
- (D)  $x \leq -1$

11 Find the area of the figure.

12) Find the volume of water needed to fill the  $\frac{3}{4}$  of the aquarium.

# EXIT TICKET

**Directions:** Answer the focus question of the two centers you completed today.

**Center 1:** How do I solve real-world and mathematical problems involving the four operations with rational numbers?

**Center 2:** How will I compare & compute unit rates associated with rational numbers and quantities measured in different units?

**Center 3:** How will learning mathematical vocabulary help me understand and explain mathematical procedures?

**Center 4:** What is scale factor and how will it help me understand how scale drawings are created?

# Friday–February 16, 2024

## BELL RINGER

7 minutes

Directions: With your group, calculate problems 1-4 using the order of operations (PEMDAS). All group members must show work on ALL problems. (If you don't, it does not count.)

b =  degrees

4) The expression  $-4(2x - 5)$  is equivalent to  $4(-2x + 5)$ .

- (A) True
- (B) False

5) Solve for  $x$ .

$$4x - 2 = 38$$

6) Ms. Streater gave her class 12 minutes to read. Danielle read  $5\frac{1}{2}$  pages in that time. At what rate, in pages per hour, did Danielle read?

7) What is the distance between - 3 and 12?

- (A) 9
- (B) - 9
- (C) 15
- (D) - 15

8) A television,  $t$ , is on sale at a 30% discount. The expressions,  $t - 0.3t$  and  $0.7t$ , can be used to represent how to calculate the cost after the sale after the sale.

- (A) True
- (B) False

# Early Finishers

9 Find the surface area of the figure below.

m<sup>2</sup>

10 The solution set of the inequality  $12 - 13x \geq -1$  is

- (A)  $x \geq 1$
- (B)  $x \geq -1$
- (C)  $x \leq 1$
- (D)  $x \leq -1$

11 Find the area of the figure.

12) Find the volume of water needed to fill the  $\frac{3}{4}$  of the aquarium.

# EXIT TICKET

**Directions:** Answer the focus question of the two centers you completed today.

**Center 1:** How do I solve real-world and mathematical problems involving the four operations with rational numbers?

**Center 2:** How will I compare & compute unit rates associated with rational numbers and quantities measured in different units?

**Center 3:** How will learning mathematical vocabulary help me understand and explain mathematical procedures?

**Center 4:** What is scale factor and how will it help me understand how scale drawings are created?
